SUMMARY

Computer Science graduate and Vodafone Discover Associate (Technology) building toward enterprise software engineering, with hands-on experience across full-stack web development, enterprise Microsoft 365 and Active Directory administration, and applied AI/ML. Works end-to-end — from developing and deploying web applications to supporting secure, scalable hybrid infrastructure for enterprise clients. Grounded in CCNA and MCSA fundamentals, multiple machine-learning certifications, and national recognition in applied-AI competitions.

TECHNICAL SKILLS

Languages & Web: JavaScript, Python, HTML5, CSS3, full-stack web development

Cloud & Enterprise Systems: Microsoft 365, Active Directory, Group Policy, Exchange Online, hybrid environments, DNS management

AI & Machine Learning: Machine learning, generative AI, model development, Python ML tooling

Networking & Infrastructure: CCNA-level networking, MCSA administration, server & IT infrastructure management

Tools & Platforms: Unity, Unreal Engine, Meta Quest / VR, CMAT, CST, DFM

PROFESSIONAL EXPERIENCE

Vodafone

Discover Associate, Technology

Jun 2026 – Present

- Selected for Vodafone's Discover Graduate Program (Technology track), a competitive one-year rotational program developing the company's future technology leaders.
- Rotate across enterprise teams within the IT department — including PromoEngine, Digital Media, and Cloud — contributing to live, cross-functional enterprise projects.
- Build hands-on expertise in enterprise infrastructure, cloud, and emerging technologies through a structured, mentor-guided development track.
- Partner with senior engineers and delivery teams to design, support, and scale technology solutions.

Concentrix

Microsoft 365 Technical Engineer

Sep 2025 – May 2026

- Delivered B2B technical support to enterprise IT administrators across multiple organizations, resolving complex Microsoft 365 issues.
- Troubleshoot Admin Portal, Exchange Online, Teams, and licensing/subscription problems in live production environments.
- Managed escalations via DFM using CMAT and CST platforms to access and maintain tenant configurations.
- Administered Active Directory and Group Policy to enforce secure, compliant hybrid environments.
- Applied CCNA and MCSA expertise to strengthen infrastructure stability and deliver scalable Microsoft 365 solutions.

Future University in Egypt

IT Engineer, Digital Media Department

Oct 2024 – Aug 2025

- Supported the Digital Media Department's immersive-technology initiatives, including VR and game-development courses.
- Provided technical guidance on Unity, Meta Quest devices, and related VR tooling to instructors and students.
- Managed campus servers and IT infrastructure to ensure system reliability and performance.
- Served as technician for British Council ICT exams, ensuring secure, standardized exam delivery.

Alwaha Travels

Full Stack Engineer & DNS Manager

Aug 2023 – Oct 2023

- Developed and deployed web applications end-to-end, delivering seamless experiences from build to production.
- Configured and managed domain names and DNS settings to optimize website performance and reliability.

G-S-T Software Solutions

Front End Software Engineer

Sep 2022 – Mar 2023

- Built responsive, user-facing interfaces with HTML, CSS, and JavaScript.
- Translated design concepts into functional, production-ready code in close collaboration with the team.

EDUCATION

Bachelor of Computer Science

2020 – 2024

Cairo Higher Institute for Engineering, Computer Science and Management · GPA: 3.5

CERTIFICATIONS

Microsoft Machine Learning Engineer Diploma (122 hrs)

2024

Ministry of Communications and Information Technology (MCIT)

Machine Learning Specialization (94 hrs)

2024

DeepLearning.AI | Stanford University

Generative AI for Software Development

2025

DeepLearning.AI

Diploma in Artificial Intelligence (160 hrs)

2023

Array Courses

Machine Learning with Python (13 hrs)

2024

IBM

AWARDS & RECOGNITION

First Place — Integrated Systems, Genius Forum Competition (Cairo)

Dec 2024

Ministry of Higher Education and Scientific Research

Second Place — Integrated Systems, Genius Forum Competition (Republic Level)

May 2025

Built with Unreal Engine, AI, and VR to solve a real-world challenge; recognized nationally for innovation.

AI Ambassador — AI Ambassadors Program

Dec 2024

National Telecommunication Institute (NTI)

LANGUAGES

English (B2) · Arabic (Native)
